Class – X A&B

The entire class of 10th B and many students of 10th A deserve a round of applause for it's not an easy task to indulge into group activity for tenth graders maintaining social distance and following the protocols of lockdown. The classes which were divided into 6 groups each did that by making use of technology successfully. Their tenacity to adjust according to the situation and being innovative are noteworthy.

The sensible approach demonstrated by the students of the entire 10th standard is highly commendable for they have shown in their group activity that how conflicts could be resolved democratically by sidelining the egos and thinking of win-win situations. Their efforts to realize how learning could be implemented in their life deserve three cheers.
